Response to Amendment

Applicant's reply under 37 CFR § 1.116, filed 10 July 2003, has been received and entered into the instant application. Claims 13, 16, 36 and 41-45 are currently pending and under consideration.

Applicant's amendment has resolved the remaining issues with the claims, and the rejections of record are withdrawn. However, a review of the instant specification revealed a problem with the sequence rules.

Sequence Compliance

At page 6, lines 12-30, 19 amino acid sequences are presented with no corresponding sequence identifier. MPEP 37 CFR 1.821 section (c) requires the inclusion of each sequence disclosed to be present in the "Sequence Listing" and section (d) requires the reference to a sequence identifier in the text of the description even if the sequence is also embedded in the text. Therefore, the specification is objected to for the failure to comply with the Sequence Rules. It appears that a new paper copy of the Sequence Listing, the CRF, and a Declaration indicating that the paper copy and the CRF are the same is required, as well as an amendment to the specification to include the sequence identifiers at page 6. If the sequences found at page 6 are already contained in the Sequence Listing, then the specification will need to be amended and a new Sequence Listing is not necessary.

Conclusion

This application is in condition for allowance except for the following formal matters:

The objection to the specification for failure to comply with the Sequence Rules, as indicated above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
